## **Aims and Scope**

This peer-reviewed journal publishes original research results in the field of environmental and ecological science, with focus on sustainable management of natural, human-dominated, and man-made ecosystems through appropriate resource use, quality assessment and recovery. The aim of the journal is to provide a place for a deep exchange of new ideas and concepts in the fields of environmental accounting, human and systems ecology, environmental management and environmental policy making. Manuscripts on environmental accounting and managements are solicited, including: mathematical modeling; computational and management techniques in environmental, ecological, energy and information science; environmental technology and engineering; human managed ecosystems such as agricultural, urban, coastal, riparian, and wetland ecosystems. Topics of interest include but not limited to:

- Environmental and ecological economics, environmental accounting (Life Cycle Assessment, energy, footprints, etc), environmental impact assessment, ecosystem services and natural capital assessment, energy and resource use, social factors and impacts, circular economy.
- Modeling in environmental conservation and restoration, eco-hydrology and water resources management, ecological processes and patterns, climate change effects, environmental engineering and technology.
- Planning and management in human dimension-institutions and patterns for socio-economic systems, industrial ecology, ecological informatics, landscape design, and urban metabolism and planning.
- Environmental policy, legislation, and innovations with environmental and strategic impact assessment, project appraisal and auditing, and environmental protection.

No length limitations for contributions are set, but only concisely written manuscripts are considered for publication. Brief papers can be published as Technical Notes. Review papers and discussions of previously published papers are also welcome.

## **Peer Review**

*Journal of Environmental Accounting and Management* adopts the traditional blind-review policy in which the reviewers' names are concealed for submission author(s). Each submitted manuscript is reviewed by at least two expert referees in the related research field.

## **Manuscript Submission Guidelines**

Author(s) should submit manuscript(s) via the website: <https://www.editorialmanager.com/JEAM/Default.aspx>. For any questions, author(s) can directly contact one of Editors. Manuscript preparation should follow the sample papers and journal manuscript templates (word file or Latex files), which can be downloaded from the website: <https://lhscientificpublishing.com/Journals/JEAM-Default.aspx>

## **Proofs and Electronic Offprints**

Authors will receive a PDF proof of their articles and, on publication, electronic offprints of the article.

## **Open Access**

After manuscript acceptance, author(s) has the right to request publication of the manuscript by L&H Scientific publishing with open access. If published as an open access, the author(s) has a responsibility to paying a publication fee of US\$60 per page. The copyright is still held by the Publisher. Without any request for open access publication, all accepted manuscripts are assumed to be published traditionally.
